JAACO COLLATED ULTRA STAINLESS HARDENED PINS

We – Shanghai Curvet Hardware Products Co., Ltd. manufacture the Ultra Stainless Hardened Pins which is similar to Stainless 304 that meets the requirements of ASTM F1667 for JAACO CORPORATION. Based on the ASTM B633 – 07 specifications, our stainless pins are anti-corrosion 50 years in the commercial/residential building and marine areas.

Ultra Stainless Steel assures longer fastener life, especially if the nail heads, that are high impact by pneumatic tool driver blades and hammers, will be left exposed to the weather.
